CONDITIONS OF USE

The recommended climate for storage is 15-25°C, relative humidity of 40-60%.

Please store in original packaging, out of direct sunlight and protected from moisture.

Before printing, please acclimatize the sheets in the original packaging in the printing room at least 24 hours before usage.

After printing a varnish or spray will help protect your print from damage, effects of UV light and environmental influences.

All recommendations are for your guidance only.
